## AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar (\$)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound	=	2 dollars (\$2).
1 shilling	=	10 cents (10c).
1 penny	=	$\frac{5}{8}$ ths of a cent ( $\frac{5}{8}$ c).

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar (\$A) is equal in value to eight shillings sterling or \$US 1.12.

## NOTES

**Rounding of Figures**—Many of the figures appearing in the tables have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

**Minimum Wage Rates**—Tables relating to minimum wage rates, as previously published in the *Quarterly Statistical Abstract*, will no longer appear in this publication. The series "Minimum Rates of Wages payable to Adult Workers under Awards of Arbitration Authorities and Industrial Agreements" and "Minimum Rates of Wages payable to Apprentices under Awards of Arbitration Authorities and Industrial Agreements in certain Trades" have been transferred to Part XII—*Retail Prices, Wages, Employment and Miscellaneous* of the *Statistical Register of Western Australia* where rates applying at the 30th June of each year will be shown. Similar series, as at the 31st December, are published in Part VI—*Factory Statistics* of the *Statistical Register of Western Australia*. The data will continue to be collected quarterly and details of rates pertaining to the March and September quarters are available on request.

**Road Traffic Accidents**—Information relating to road traffic accidents and casualties has been introduced in the *Quarterly Statistical Abstract* in this issue; see Table No. 56—"Road Traffic Accidents: Accidents and Casualties." More detailed information on this subject is available in the mimeographed publications *Road Traffic Accident Statistics* issued quarterly and annually.

**Industrial Disputes**—A summary of the principal statistics of industrial disputes appears for the first time in the *Quarterly Statistical Abstract* in this issue; see Table No. 47—"Industrial Disputes."

**External Trade**—Statistics of external trade, as published in this issue of the *Quarterly Statistical Abstract*, are presented on a new basis.

From the 1st July, 1965, when a new Australian Customs Tariff was introduced, imports have been classified according to an Australian Import Commodity Classification based on the *United Nations Standard International Trade Classification, Revised*.

The Standard International Trade Classification (and consequently the Australian Import Commodity Classification) follows closely the "Brussels" tariff nomenclature used in the new Australian Customs Tariff. The Standard International Trade Classification consists of 10 broad commodity categories designated "Sections" and comprising 56 commodity "Divisions" which are further divided into 177 commodity "Groups." The structure of the classification serves to provide a summary of data relating to 1,312 basic items of international trade. The Sections, Divisions and Groups, and the relevant reference numbers, are shown in Tables Nos. 24 and 25.

From the 1st July, 1966, an Australian Export Commodity Classification, also based on the Standard International Trade Classification, will be adopted in the tabulation of export information.

In this issue particulars of imports during the three months ended September, 1965 are derived from tabulations prepared in accordance with the Australian Import Commodity Classification. The figures shown for exports during the three months ended September, 1965, and for imports and exports during the year ended June, 1965, are estimates derived by allocating particulars relating to individual items of trade, as recorded on the old basis, to the most appropriate commodity description in the new classification. In some cases, the descriptions of commodity Divisions and Groups, as shown in Tables Nos. 24 and 25, are abbreviations of the full text, which is available in the Australian Import Commodity Classification issued by the Commonwealth Bureau of Census and Statistics, Canberra.

The abbreviation "n.e.i.", where it occurs in the tables, denotes "not elsewhere included."

# STATISTICS OF WESTERN AUSTRALIA

Area of State—975,920 square miles

Area of Metropolitan Statistical Division—192 square miles

## I—POPULATION AND VITAL STATISTICS

*Note*—For dates subsequent to the latest Population Census the estimated population represents the population ascertained at the Census plus natural increase and recorded net migration since the Census. As complete records of migration are not available, the population estimates so derived are subject to revision when the actual population is ascertained at the next Census. The figures shown for dates and periods prior to 30th June, 1961 have been revised in accordance with the results of the 1961 Census.

Full-blood aboriginals are not included in the following tables. The number on 30th June, 1961, was estimated to be 10,000.

(a) Most cargoes are recorded in terms of the ton weight of 2,240 lb. but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of "tons weight" or "tons measurement". In order to provide a ready comparison, as in this table, of the volume of cargo handled at the several ports or in different periods, the amounts recorded in the two categories have been aggregated. In Table No. 20 details of cargo handled at each port are presented separately on the basis of "tons weight" and "tons measurement".

## VII—PRODUCTION

### No. 32—Estimated Net Value of Production

*Net Value of Production* is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income and profit. For Primary Production it is obtained by deducting from the value realized at the principal market all marketing costs and the cost of goods used in production (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.). For Manufacturing, it is obtained by deducting from the selling value at the factory door the cost of goods consumed in the process of production (*i.e.*, materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packing).

## XV—BUILDING OPERATIONS

### No. 51—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by governmental agencies and the activities of "owner-builders." The term "Owner-built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

## XVII—MOTOR VEHICLE REGISTRATIONS

In Western Australia there is no single authority responsible for the licensing of vehicles. The Traffic Branch of the Police Department licenses vehicles in the Metropolitan Traffic Area as defined in Regulations made under the Traffic Act, 1919-1965. Outside the Metropolitan Traffic Area each Town or Shire Council is responsible for the licensing of vehicles in its own district.

(a) The population figures contained in this table exclude full-blood aboriginals. The numbers shown for dwellings at the Census of 30th June, 1961 exclude those occupied solely by full-blood aboriginals. (b) For the purpose of this table the term "dwelling" means any habitation occupied, or for occupation, by a household group living together as a domestic unit whether comprising the whole or only part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. (c) The numbers shown for unoccupied dwellings do not represent only vacant houses or flats available for sale or renting. They include week-end and holiday homes, seasonal workers' quarters and other dwellings which were not occupied on the night of the Census, as well as newly-completed dwellings whose owners or tenants had not entered into occupation. (d) Includes unoccupied dwellings. (e) Comprises persons (both passengers and crew) not enumerated elsewhere who spent Census night on ships, long-distance trains or aircraft. (f) See note (g). (g) Represents population at the Census of 30th June, 1961, plus natural increase and recorded net migration since that date ; subject to revision after the next Census. In 1965
